Fine-Tuning

Years ago we had a "fine-tuning" button on our TV sets. We could "fiddle" with this button to receive a clear, crisp picture and enjoy the program. Today's fancy digital models that are manufactured with increased technology negate the need for such "fine-tuning."

Don't let that convince you that fine-tuning is out of style, though. ChemStation is still fine-tuning products to meet our customers' specific needs. Every day our team of chemists are adding a touch of this or changing the structure of that to create a cleaning product that ends up being "your solution." We now have products that meet stringent EPA requirements and have earned the DfE (Design for the Environment) certification.

Custom-blended products are just one part of the overall solution that includes environmentally friendly products delivered to refillable containers. ChemStation's fine-tuned products are an integral part of the unique system that sets us apart, providing you with efficient, economical, environmentally friendly, and safe solutions. We're about refill… not landfill.

Compliance Plus Convenience

When deciding where to display your workplace safety posters, follow these simple common sense guidelines:

- Display in high traffic areas.
- Place on a wall that faces the direction of travel.
- Hang them at eye level.
- Coordinate safety topics at meetings that correspond to posters currently on display.
- Ensure maximum awareness by rotating your posters once a month. This will keep your message from becoming stale and ignored.

THINKING GREEN

Greener Shipping Options

- Each American sends about 300 pounds of packaging to the landfill every year, so there's plenty of room for improvement.
- Pay attention to packaging. Your greenest option is to reuse materials such as boxes, bubble wrap, and peanuts…or to use items you already have on hand such as newspapers.
- When you have to buy new, choose biodegradable packing materials or those made from post-consumer recycled content.
- Choose ground shipping. Sending packages by plane emits eight times more carbon dioxide than transporting by truck.
- Order free envelopes and boxes from the United States Postal Service that have been Cradle-to-Cradle certified for meeting high environmental standards.

By the Numbers

Gallons of soap delivered:
144,353,498 since 1984

Empty drums not in landfills:
2,624,609 since 1984

World of Asphalt 2009

Visit ChemStation in Booth #1841 at ***World of Asphalt 2009***, March 9-12, 2009 at the Orange County Convention Center in Orlando, FL.

World of Asphalt 2009 focuses exclusively on the asphalt industry, and is the industry's leading exposition and education resource. Featured are in-depth, industry-focused educational programming and comprehensive exhibits showcasing the latest technologies and innovations in asphalt-related equipment, products, and services.

SHOW & CONFERENCE

Protective Equipment Training

Protective equipment training can be carried out using a demonstrator, overheads, a presentation, or DVD video. Regardless of the method, protective equipment training is something that cannot be overlooked.

The basic components of protective equipment training include training employees to efficiently wear protective equipment, training employees to maintain protective equipment, and educating them on the ability to assess when protective equipment is necessary.

Personal protective equipment training should also be able to convince employees that they are not invincible while wearing protective equipment, and there are restrictions to the level of protection they possess.

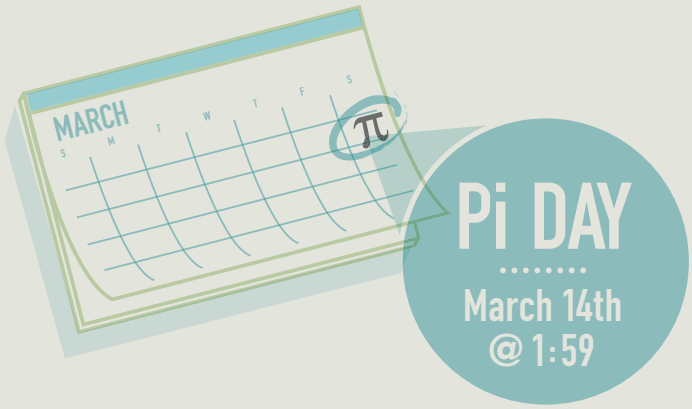

International Pi(π) Day

Plan to celebrate this international "geek" holiday on Saturday, March 14.

Celebrate the number: The number is Pi, 3.1415926535…ad infinitum. It's the date and starting time (March 14 at 1:59 p.m.)…the number you get when you divide the circumference of a circle by its diameter, and it cannot be expressed as a fraction. It continues forever. Pi is also Einstein's birthday!

The first Pi Day celebration was held at the San Francisco Exploratorium in 1988 with staff and public marching around one of its circular spaces, and then consuming fruit pies; the museum has since added pizza pies to its Pi Day menu.

Others who celebrate Pi Day include the Massachusetts Institute of Technology which often mails out its acceptance letters to be delivered to prospective students on Pi Day.

SOAPBOX

If you didn't start out the day with a smile, it's not too late to start practicing for tomorrow.

You know that your children are growing up when they start asking questions that have answers.

Law of the Theater: At any event, the people whose seats are furthest from the aisle arrive last.

Courage is the art of being the only one who knows you're scared to death.

If winning isn't everything, why do they keep score? – *Vince Lombardi*

Finance is the art of passing money from hand to hand until it finally disappears.

The reason lightning doesn't strike twice in the same place is that the same place isn't there the second time.

If you don't care where you are, you aren't lost.

When Solomon said there was a time and a place for everything he had not encountered the problem of parking his automobile.

A gentleman is a man who can play the accordion but doesn't.

People are like toes – the world's full of them, but only a few you can count on personally.

The best measure of a man's honesty isn't his income tax return. It's the zero adjust on his bathroom scale.

You do not need a parachute to skydive. You only need a parachute to skydive twice.

If the population of China walked past you, in single file, the line would never end because of the rate of reproduction.

Patience, *n*. A minor form of despair, disguised as a virtue.

Never believe in anything until it has been officially denied.

Skill is successfully walking a tightrope over Niagara Falls. Intelligence is not trying.
