INSIGHTS

Vol. XVII No. 7, July 2005

Here We Grow Again!

We took Horace Greeley's advice to "go West" and we're celebrating the opening of our new Manufacturing Center in Portland, OR. This new facility becomes the 52nd pin on our network map of Manufacturing Centers that are supplying customers with our environmentally safe, water-based detergents and process chemicals.

In our 21st year of "Keeping it Clean" we continue to offer you our custom formulated industrial cleaning products through a system that does not litter and contaminate the countryside with rusty barrels and product residues…doing our part to help keep our environment clean. ■

Over-Filling Gas Tanks

Do you top off your gas tank? When the gas pump nozzle clicks off automatically, do you add a little more gas to round off your dollar sale? According to EPA, topping off your gas tank is bad for the environment and your wallet.

Topping off can result in your paying for gasoline that is fed back into the station's tanks because your gas tank is full. The gas nozzle automatically clicks off when your gas tank is full. In areas of ozone nonattainment, gas station pumps are equipped with vapor recovery systems that feed back gas vapors into the tanks to prevent vapors from escaping into the air and contributing to air pollution. Any additional gas you try to pump into your tank may be drawn into the vapor line and fed back into the station's storage tanks.

You need extra room in your gas tank to allow the gasoline to expand. If you top off your tank, the extra gas may evaporate into your vehicle's vapor collection system. That system may become fouled and will not work properly causing your vehicle to run poorly and have high gas emissions. Remember…you pay for the gas that evaporates, is spilled on the ground, or is drawn into the vapor line and fed back into the storage tanks at the station. ■

Shine Up Those Dull Floors

Got dull floors? Maybe you need to look at one of ChemStation's shiny new products. One of our customers (a wholesale club) in New England was looking for something to improve the shine under their feet and our chemists designed a product that will develop and maintain a gloss on concrete floors while it cleans. Check it out with your account representative. ■

July in Review

July is National Baked Bean Month, National Doghouse Repairs Month, and National Hot Dog Month. On a weekly basis you can celebrate Freedom From Fear of Speaking Week (3-9), Be Nice to New Jersey Week (3-10), and Air Conditioning Appreciation Week (3-15). U.S. postage stamps went on sale for the first time on July 1, 1847. That was the same day that taxes began to be withheld from paychecks in 1943 and ZIP codes went into use in 1963. On July 2, 1955 (for those of you who can remember) the Lawrence Welk show premiered on television. July 4 is Independence Day. National Ice Cream Day is celebrated on July 17 which happens to be the day Walt Disney's Disneyland opened in Anaheim, CA in 1955. In "one small step for man, one giant leap for mankind," astronaut Neil Armstrong became the first person to walk on the moon on July 20, 1969. The month ends with the celebration of All-American Soap Box Derby Day on the 31st.

Hot Dog Stats

2005 (Projections from annual survey of Major League ballparks)

Dodger Stadium	1,674,400
Coors Field	1,545,000
Wrigley Field	1,543,500
Yankee Stadium	1,365,000
Minute Maid Park	1,248,000
Edison Field	1,133,000
HHH Metrodome	850,000
Citizens Bank Park	800,000
Shea Stadium	745,000
U.S. Cellular Field	495,000
