Saving You Time, Money...and Water!

ChemStation's refillable tank system saves you time and money spent ordering, receiving, moving, handling, storing, and disposing of containers. Switching to ChemStation refillable tanks also eliminates the need to rinse traditional 55-gallon drums, saving you time and water. Here's what you avoid:

- Completely emptying the drum.
- Filling the drum to 25% of its capacity with clean water. **(That's 13.75 gallons of water.)**
- Rolling and tipping to thoroughly coat the interior.
- Draining rinse water into an appropriate container.
- Repeating these steps at least two more times. **(That's a total of 41.25 gallons of water per drum!)**

Every year, ChemStation prevents over 250,000 55-gallon drums from reaching landfills. That's 10,312,500 gallons of water saved annually by avoiding triple rinsing!

Tips to Avoid Phishing

As we head into the holidays, phishing scams will try to get us to open harmful attachments or share personal information. Avoid phishing with these simple tips from the Cybersecurity & Infrastructure Security Agency (cisa.gov):

1. **Recognize** – Look for these common signs: Urgent or emotionally appealing language; Requests to send personal and financial information; Untrusted shortened URLs; Incorrect email addresses or links.
2. **Resist** – If you suspect phishing, resist the temptation to click on links or attachments that seem too good to be true and may be trying to access your personal information. Instead, report the phish to protect yourself and others.
3. **Delete** – Delete the message. Don't reply or click on any attachment or link, including any "unsubscribe" link.
