MEAT PROCESSING

CHOOSE CUSTOM FORMULATED DETERGENTS AND SANITIZERS FROM CHEMSTATION

To meet the specialized needs of meat processing plants, ChemStation offers:

- Water-based, biodegradable blends of synthetic detergents, emulsifiers, and wetting agents
- Distinct surfactant packages able to accommodate a wide range of foam characteristics
- Unique chemical blends that are safe to use on polycarbonate plastics, aluminum, and other soft metals
- Easy-to-use concentrates that do not require supplementary water conditioners or other additives

Acid Cleaners / Neutralizers

- Acid cleaners will clean and brighten aluminum and stainless steel and can also be used to neutralize alkaline solutions.

Alkaline Cleaners

- Mild, heavy-duty, chlorinated and nonchlorinated alkaline detergents, with or without foam, are designed for your toughest cleaning challenges. These custom-formulated detergents wash surfaces clean and rinse freely.

CIP and COP Products

- ChemStation's free-rinsing CIP and COP cleaners are ideal for soak tanks, transports, and wash machines. These cleaners are safer to use than powdered caustic products and do not leave any undissolved residue.

Cold Environment

- ChemStation customizes detergents to handle extreme temperature demands.

Degreasers

- Our custom detergents emulsify grease, fats, and oils. They can be used on dry curing areas, ovens, conveyors, tables, floors, walls, and other hard surfaces.

Drain Cleaning

- Our disinfectant cleaner is effective against mold, mildew, and dangerous food pathogens and it eliminates biofilms.

Floor Cleaners

- ChemStation's custom manufactured floor cleaners can be dispensed using our scrubber fill station. Our system eliminates employee chemical handling and reduces the time needed to fill floor scrubbers.

Foaming Detergents

- ChemStation's products are specially designed for meat processing operations. They emulsify animal fats, blood, oils, cooked-on soil and smoke quickly and economically.

Line, Conveyor, and Chain Lubricants

- ChemStation's lubricants rinse away clean and are safe for your equipment.

Sanitizers and Disinfectants

- Choose from chlorine, iodine, quat, peroxyacetic acid (PAA), and other chemistries specific to your situation or needs to eliminate pathogens in your plant.

Smokehouse / Oven Cleaners

- These high-foam, alkaline products remove cooked-on soil and smoke.
