APRIL 2026 vol. XXXIX no.4

## See You at CheeseExpo 2026!

ChemStation's Eagle Team is heading to CheeseExpo 2026 in Milwaukee! You will find them April 14–16 at the Baird Center, Booth #1819, where over 4,000 cheese, butter, whey, and cultured dairy processing leaders gather for the industry's biggest event of the year.

ChemStation will be there showcasing how our dairy sanitation solutions are custom-formulated to clean smarter – eco-friendly, water-based, and backed by decades of expertise in flowable foods:

- Biodegradable sanitation chemicals
- Refillable delivery system
- Reliable, local support from our Eagle Team

Join us for Happy Hour at the ChemStation Booth (#1819) on Wednesday, April 15th from 2–4pm – stop by and let's talk dairy sanitation.

For tickets and to learn more about this event, visit cheeseexpo.org.

## Micro Monthly: How to Prevent Shrinking Shelf Life

Join us on April 24 at 11am ET/10am CT as we examine the microbial drivers of spoilage in Ready-to-Eat (RTE) meat products. In this session, **Mitchell Younie**, Account Manager and Eagle Team member, and **Kara Mikkelson**, Director of Food Safety, will discuss the key environmental, microbiological, and process factors that contribute to spoilage in RTE meat systems.

Participants will gain insight into common spoilage organisms, environmental contributors, and preventive controls that support effective shelf-life management in RTE meat production.

## Cleaner Science

Water isn't just what we work with. It's why we work the way we do. It's the foundation of life. It's the foundation of clean. And it's why every ChemStation solution starts the same way – with a deep understanding of the water profile unique to your facility.

That facility-specific knowledge shapes everything: the formula, the system, the delivery. Efficient design needs less, wastes less, and performs better. Because when you get water right at the beginning, you protect it at the end. We're reaffirming what's always been true since 1977 – Cleaner Science starts with water, and it makes the most of every drop.
