POULTRY PROCESSING

CHOOSE CUSTOM FORMULATED DETERGENTS AND SANITIZERS

To meet the specialized needs of poultry processing plants, ChemStation manufactures water-based, biodegradable sanitation and process chemicals which:

- Are blends of synthetic detergents, emulsifiers and wetting agents
- Span the foaming spectrum from no-foam to high-foam
- Are safe for use on aluminum and other soft metal surfaces and on polycarbonate plastics
- Work effectively in hard or soft water and require no special softeners or additives
- Will not dull, waterspot or streak stainless steel, tile or painted surfaces

PRODUCT OPTIONS

Alkaline Cleaners – Mild, strong, and chlorinated alkaline cleaners designed for every cleaning process on every surface from shipping and receiving to slaughtering, eviscerating, secondary processing, and packaging areas.

Acid Cleaners – Acid cleaners are used to clean and brighten aluminum and stainless steel.

CIP and COP Products – ChemStation's free-rinsing cleaners are ideal for process equipment, transports, and wash machines. These cleaners are safer to use than powdered caustic products and do not leave undissolved residue.

Sanitizers – Sanitizers include quaternary ammonium products, peroxygen products, and sodium hypochlorite products to be used in your slaughtering, processing, packing areas, and drains.

OUR SERVICE PACKAGE INCLUDES:

Refillable System – Unique refillable tank system saves time and money spent handling and disposing of containers. No freight costs or container deposits.

A Safer Solution – Eliminate risks associated with receiving, handling, storing, servicing, rinsing, and disposing of drums and totes.

Audit Support & Training – Our sales and service teams partner with you to optimize your SSOPs, training programs, record-keeping, and general audit preparations.

Inventory Management – Use Tank Telemetry to view chemical levels on demand. Forecast data, track usage, and access reports at your fingertips.

Local Service & Support – Customize an account management plan with your ChemStation team and address sanitation issues before they arise. Our local team can respond rapidly to all of your service needs.

Environmental solutions with a refillable delivery system that eliminates potential environmental contamination from discarded containers.
