NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

1. NATURE OF OPERATIONS AND LIQUIDITY RISK

Mundoro Capital Inc. (“Company”, or “Mundoro”) is a mineral exploration and royalty generation company with a diverse portfolio of copper and gold exploration projects in Serbia, United States, and Bulgaria. The Company has two business segments – mineral exploration operations and project generation. The objective of the project generation part of our business is to grow the assets in a disciplined and sustainable manner that will provide exposure to exploration opportunities and discoveries. Mundoro identifies, stakes, and acquires new projects and performs early-stage work to demonstrate their geologic potential. The Company then seeks partners who bring the capital and additional technical expertise to delineate a mineral deposit. Mundoro retains exposure to the property through royalties, advance royalty payments, milestone payments, and equity consideration. The business of exploration and development involves a high degree of risk and there can be no assurance that current exploration and development programs will result in discovery or future profitable operations.

Mundoro was incorporated on March 6, 2008, under the Business Corporations Act of the Province of British Columbia and is a Canadian based mineral acquisition, exploration and development company. The Company’s common stock is quoted on the TSX Venture Exchange (“TSXV”) under the symbol MUN. The Company’s head office and principal address is 14th floor - 1040 West Georgia Street, Vancouver, British Columbia, Canada V6E 4H1.

These condensed interim unaudited consolidated financial statements have been prepared using International Financial Reporting Standards as issued by the International Accounting Standards Board (“IFRS accounting standards”) applicable to a going concern, which assumes that the Company will be able to continue its operations and will be able to realize its assets, discharge its liabilities, and continue in operation for at least twelve months from September 30, 2025. As at September 30, 2025, the Company has an accumulated deficit of \$62,640,738 (December 31, 2024 - \$61,688,468) and a working capital (current assets less current liabilities) of \$679,711 (December 31, 2024 - \$1,960,998).

Subsequent to the reporting period, and completed as of November 12, 2025, the Company completed a private placement of common shares, raising CAD \$1.5 million. Management expects that its cash balance and cash flows from operating activities will be sufficient to fund the operations of the Company for twelve months from September 30, 2025. Management has the ability to reduce discretionary expenditures as necessary to manage cash flows.

These condensed interim unaudited consolidated financial statements were authorized for issue by the Board of Directors on November 27, 2025.

2. MATERIAL ACCOUNTING POLICIES AND BASIS OF PREPARATION

Statement of compliance with International Financial Reporting Standards

These unaudited condensed interim consolidated financial statements of the Company have been prepared in accordance with IFRS Accounting Standards. These interim financial statements do not include all of the information required of a full annual financial statements and is intended to provide users with an update in relation to events and transactions that are significant to an understanding of the changes in financial position and performance of the Company since the end of the last annual reporting period. It is therefore recommended that these interim financial statements be read in conjunction with the annual financial statements of the Company for the year ended December 31, 2024. The accounting policies applied by the Company in these financial statements are consistent with those of the previous financial years.

Basis of preparation and consolidation

These unaudited condensed interim consolidated financial statements have been prepared on a historical cost basis, except for the Company’s investments which are recognized at fair value. They are prepared using the accrual basis of accounting, except for cash flow information, and include the accounts of the Company and its subsidiaries. Intercompany balances and transactions, including unrealized income and expenses arising from inter-company transactions, are eliminated on consolidation.

Management judgements and key sources of estimation uncertainty

The preparation of financial statements in conformity with IFRS requires management to use judgment in applying its accounting policies and estimates and assumptions about the future. Estimates and other judgments are regularly evaluated and are based on management's experience and other factors including expectations about future events that are believed to be reasonable under the circumstances. Judgment is required in assessing whether certain factors would be considered an indicator of impairment. Both internal and external information are considered to determine whether there is an indicator of impairment present and therefore, whether impairment testing is required.

3. THIRD PARTY FUNDED EXPLORATION PROGRAMS

Amounts received from third parties earning into a license(s) are netted firstly against the capitalized exploration expenditures on the applicable licenses and thereafter are recognized in the Company's Consolidated Statement of Income/(Loss). Any advances received for budgeted exploration work program expenditures, or any reimbursable funds expended by the Company are recognized separately in the balance sheet. Fees earned include operator fees earned as the designated operator of the projects and option fees earned during the option period while the third party is earning in, all of which are recognized in the Company's Consolidated Statement of Income/(Loss).

Where Mundoro is contractually entitled to Cash Call Deposits in respect of a future budgeted exploration work program period, those amounts are included in Amounts Receivable from Partners. The balance of this account at September 30, 2025, was \$763,604 (December 31, 2024 - \$nil).

When Mundoro cash calls a partner in advance of the budgeted exploration work program being performed, the funds are shown as Advances from Partners. The balance of this account at September 30, 2025, was \$4,159,801 (December 31, 2024 - \$4,564,503). These funds are required to be used for exploration expenditures for partner programs.

During the nine months ended September 30, 2025, the Company increased its mineral interests by \$458,174 (2024 – \$439,177) related to acquisition costs incurred on its projects in Europe and North America. During the period, the Company wrote down \$nil (2024 - \$nil) in mineral interests and \$8,240 from Option payments received were allocated to mineral interests (2024 - \$8,370).

Serbian Properties

The Company holds through its Serbian subsidiaries, the following 100%-owned exploration licenses in Serbia: Branik, Bobot, Odej, Odej South, Gramada, Oblez, Skorusa, Trstenik, Crvena Zemlja, Ruzana, Orlovac, Ponor, Vitanovac, and Lipovica.

BHP-Mundoro Projects

In Q1-2023, Mundoro announced the Company entered into an agreement with BHP Group Limited (“BHP”) whereby BHP can earn-in to five (5) of the Company’s licenses which are divided into three exploration project Options. Since then, the licenses have increased to 8 and are now comprised of: Trstenik, Crvena Zemlja, Ruzana, Orlovac, Ponor, Vitanovac, and Lipovica. Each of the three Options provides BHP with the right to earn a 100% interest in the relevant Project by making (i) annual cash payments and operator payments (“Payments”) to Mundoro, with the aggregate amount of Payments for the three properties over three years amounting to approximately US\$1,700,020, and (ii) incurring exploration expenditures within three years on the three Options amounting to US\$7,500,000. BHP may exercise each Option independently or elect to extend each Option by one year by making additional Payments and incurring additional exploration expenditures. Upon exercise of each Option, Mundoro will retain a 2% net smelter return (“NSR”) royalty that includes development milestone payments for a total up to US\$9,000,000 and annual cash payments until commercial production commences. Mundoro is appointed as the initial operator under the Options.

Mundoro Properties

Mundoro holds a 100% interest in the Branik, Bobot, Odej, Odej South, Gramada, Oblez, and Skorusa exploration licenses in Serbia. After the quarter end, and at the time of this report filing, these projects were optioned to BHP under an option agreement dated October 12, 2025. See Subsequent Events Note 15.

Bulgarian Properties

JOGMEC-Mundoro Project

In Q1 2019, Mundoro entered into a Generative Program Agreement (“Generative Agreement”) in the Republic of Bulgaria (“Bulgaria”) with Japan Oil, Gas and Metals National Corporation (“JOGMEC”). JOGMEC has designated a few properties as Designated Projects to proceed to the next stage of the Generative Agreement (“JOGMEC Designated Project”). Mundoro has a number of applications at the Bulgarian Ministry of Energy (“BMoE”) for areas of exploration that are the selected JOGMEC Designated Projects. In Q4-2021, a contract was signed with the BMoE for one of the JOGMEC Designated Projects located in western Bulgaria, the “EE1 Project”. Mundoro and JOGMEC entered into an Earn-In and Joint Venture Agreement on March 17, 2022 (EI and JV Agreement) for the exploration of the EE1 project. The EI and JV Agreement provides a stage one earn-in option granted to JOGMEC for a 51% interest following contributions of certain expenses. JOGMEC has completed the stage one earn-in. The stage two additional earn-in option allows JOGMEC to acquire an additional 24%, for a total of 75% interest in the EE1 project by completing a Preliminary Economic Assessment over six years from May 1, 2022. On the completion of stage two, JOGMEC will have the right to purchase an additional 5% interest from Mundoro for a total interest in the EE1 project of 80%. Mundoro would then be free carried to Commercial Production.

Mundoro Properties

In September 2017, the Company’s local subsidiary in Bulgaria was announced as the winner of the Svoboda tender process. Certain legal and administrative procedures must be completed in order for an exploration contract to be entered into between the Company’s subsidiary and the BMoE. The Company has submitted a number of applications to the BMoE and continues to coordinate with the responsible Ministries in order to advance its applications.

USA Properties

The Company holds through its USA subsidiaries, the following properties: Dos Cabezas, Picacho and Copperopolis.

Dos Cabezas Property

The Dos Cabezas Project is held 100% by Mundoro and is available for new partnerships.

Picacho Property

The Picacho Project is held 100% by Mundoro and is available for new partnerships.

Copperopolis Property

The Copperopolis Property is located in northwest Arizona in Yuvapi County and was acquired by staking and applying for Arizona State Claims in Q4-2023 and Q3-2024. In Q2-2025, the Company ("MUN") executed a Property Agreement (the "Agreement") with a third party (the "Third Party") concerning the Copperopolis Property (the "Property"). The Agreement establishes initial participating interests (MUN: 73.09%; Third Party: 26.91%). The Third Party acquired their participating interest by funding exploration expenditures. The Agreement mandates proportionate funding of exploration expenditures by each party, outlines dilution mechanisms, and designates MUN as the operator as well as the party responsible for seeking a new funding partner. The Agreement is subject to termination upon MUN entering into a definitive agreement with a new funding partner for the Property. Upon such termination, the Third Party's then-current participating interest, reflecting any adjustments, will convert into a royalty on the Property.

9. EXPLORATION AND PROJECT GENERATION

14. FINANCIAL RISK MANAGEMENT

The Company is exposed to various financial risks, including foreign currency risk, interest rate risk, credit risk, and liquidity risk.

Foreign Currency Risk

The Company incurs expenses in currencies other than the Canadian dollar, making it susceptible to exchange rate fluctuations. To manage this risk, the Company maintains bank accounts primarily in US dollars and Canadian dollars. The Company converts funds to other currencies, such as Bulgarian leva and Serbian dinars, as needed to fulfill its obligations. The Company does not engage in currency hedging activities.

Interest Rate Risk

Cash and cash equivalents are held in bank accounts or GICs with fixed interest rates. Future interest income will be impacted by declining cash balances. The Company manages interest rate risk by investing in short-term fixed-rate instruments with staggered maturity periods to maintain liquidity. A 25 basis-point change in interest rates would have an immaterial effect on comprehensive income based on current balances.

Credit Risk

Credit risk arises from potential losses if a joint venture partner, counterparty, or third party to a financial instrument fails to fulfill its contractual obligations. To reduce credit risk, cash and cash equivalents and short-term investments are on deposit at major financial institutions. The Company is not aware of any counterparty risk that could have an impact on the fair value of such investments. The carrying value of the financial assets represents the maximum credit exposure. The Company minimizes credit risk by reviewing the credit risk of the counterparties to its arrangements on a periodic basis.

For the period ended September 30, 2025 the Company's short-term money market instruments were invested in GICs earning annual interest rates of 3.45% to 3.40% (December 31, 2024 –3.45%).

Liquidity Risk

Liquidity risk is the possibility that the Company may not meet its financial obligations as they become due. A detailed planning and budgeting process is in place to forecast funding needs and ensure adequate resources for operations, including exploration activities. The Company invests excess cash in highly liquid, bank-sponsored instruments and staggers investment maturities to balance liquidity and returns. Advances from joint venture partners are aligned with planned exploration budgets and reduced monthly as exploration costs are recovered.

Commodity Price Risk

The ability of the Company to explore and market its exploration assets as well as the future profitability of the Company are directly related to the price of copper and gold and the marketability of these metals. The Company monitors metals prices to determine the appropriate course of action to be taken.

Market Risk

The Company holds securities of a private company. The value of these securities is at risk of fluctuation, and it is driven by security specific and market specific risks. The Company has no control over the volatility of its value and does not hedge its investment.

15. SUBSEQUENT EVENTS

On October 13, 2025, the Company entered into an option agreement with a wholly-owned subsidiary of BHP Group Limited (“BHP”) granting BHP the right to earn a 100 % interest in seven exploration licences in the Central Timok region of Serbia. BHP may earn the interest over 10 years by funding up to US\$ 35 million in exploration, while the Company retains a 2 % net smelter return royalty. The agreement includes annual option payments and operating fees, with BHP potentially assuming operatorship once certain thresholds are met.

The Company announced that further to its news release dated October 24, 2025, announcing a private placement to raise aggregate proceeds of C\$1,500,000 (the “Financing”), the Company received a surplus of subscriptions for a total of 5,836,540 Common Shares (“Common Shares”) at a price of C\$0.26 per Common Share to raise aggregate gross proceeds of C\$1,517,500.
