SECURE ENCLAVES FOR BRIGHTER TOMORROWS

SAFER STUDENTS.

SMARTER RESEARCH.

STRONGER INSTITUTIONS.

BRIGHTER TOMORROWS.

UNLOCK THE POTENTIAL OF YOUR DATA — RESPONSIBLY.

Trusted data. Confident AI. Greater opportunity.

Secuvy provides the intelligence layer for Secure Enclaves—helping colleges, universities, and research institutions securely discover, classify, and govern their data so they can confidently use AI, analytics, and modern applications to advance learning, research, and innovation.

THE SECURE ENCLAVE CHALLENGE

SENSITIVE DATA EVERYWHERE
Student, research, and administrative data across campus, cloud, and partner environments.

AI INCREASES RISK
Generative AI tools can expose sensitive data without the right controls.

COMPLEX COMPLIANCE
Meet FERPA, research, privacy, and state regulations while enabling data access for authorized use.

SLOW PROGRESS
Manual processes and fragmented tools delay innovation and limit insights for students, faculty, and researchers.

HOW SECUVY MAKES SECURE ENCLAVES VALUABLE

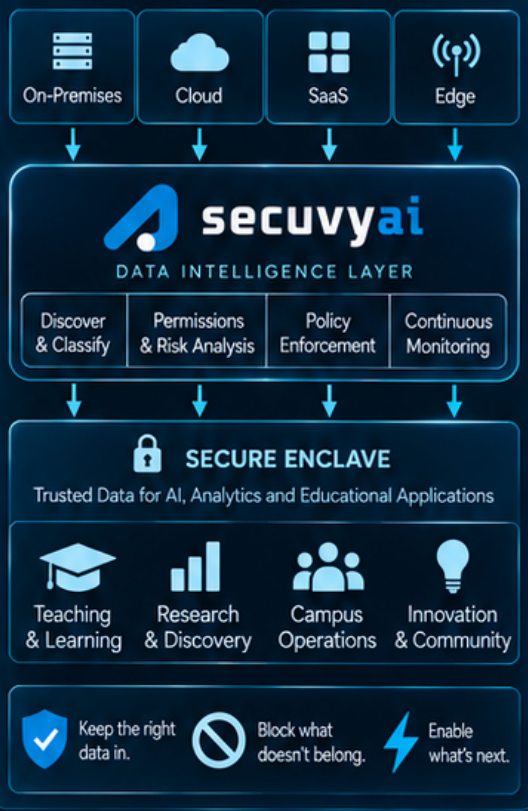

DISCOVER & CLASSIFY ALL DATA
Find and classify 100% of your data across environments — no sampling, no blind spots.

UNDERSTAND CONTEXT & RISK
Analyze data sensitivity, permissions, and AI exposure risk in context.

ENFORCE & CONTROL
Keep sensitive data in the enclave, remove risk from AI tools, and maintain continuous compliance.

ENABLE INNOVATION
Accelerate secure AI, analytics, and modern applications — so your institution can turn data into discovery, learning, and real-world impact.

THE SECURE ENCLAVE DATA FLOW

BUILT FOR EDUCATION

- Higher Education
- Community Colleges
- K-12 School Districts
- Research Institutions
- Academic Consortia

KEY OUTCOMES

- Protect sensitive student and research data
- Enable safe and effective use of AI
- Simplify compliance with FERPA and state regulations
- Accelerate research and institutional innovation
- Create better outcomes for students, faculty, and communities
